**Staging:** At this track there will be 2 people doing staging. One person (**A: Pit in**) will be checking for safety (ie: wrist bands, helmet straps, seat belts, doors, windows, hoods, shirt sleeves, loose objects, etc.) and assisting the drivers to enter the hot pits, making sure there is no interference with cars exiting the track. The other person (**B:Pit out**) will be double checking safety and releasing cars to enter the flow of track traffic in a safe manner.

**Control:** This involves monitoring the track control radio upstairs in the tower for on- track incidents, logging those events, and making announcements for staging (1st call, 2nd call and last call). If you have never done this job before and have any questions or concerns you are welcome to come up to the tower and check it out.
